

Dr. Jenny is a 1998 graduate of the University of Minnesota School of Dentistry. It is her goal to help people that experience gum disease and cavities and prevent it from causing pain or disease progression. She treats the whole person, understanding that there is more to dentistry (and you) than simply doing something to the teeth.

She dedicates many continuing education hours to help serve you better with treatment of decay, missing teeth, and toothaches. She is able to successfully treat muscle problems, functional problems, TMJ problems, and give you that amazing smile you may be looking for. She is excited to be a part of the academy of General Dentists (AGD). She is a member of the Academy of Cosmetic Dentists, Dawson Center for Advance Learning, the International Association of Orthodontics, and is a Bioclear Alumni. She is also a fellow of the Great Lakes Implant Institute and Spear Education.

Dr. Jenny has two kids (Toby and Holly) in the Zimmerman/Elk River school district. In her spare time, she is busy appreciating and enjoying her kids and their activities. She loves to travel, read, bike, go to the lake, and be with family and friends.
