

We provide comprehensive and emergency exams, soft and hard tissue exams, gum disease exams, bite evaluations and corrections, oral cancer screening, diagnostic x-rays, non-surgical periodontal therapy, periodontal pocket medications, cosmetic fillings, root canals, crowns, sedative fillings, emergency treatment, whitening, braces, dentures, veneers, partials, treatment for kids, preventative resin restorations (PRR) and the ability to discuss prevention of decay and gum disease. Our services include:

General Dentistry: Dental health exams, hygiene visits, diagnostic x-rays, and more. It is our priority to keep you well-informed of your oral health, and to provide options that are best suited for your needs and wants.

Children's Dentistry: We change our time, technology, and terminology to make this easy for your child. We love kids and strive to make sure we edify your child and make their visit positive and memorable.

Orthodontics: We provide full and complete traditional orthodontics services, from braces, to palate expanders, to underbite correction, and more.

Cosmetic Dentistry: Our goal is to make your teeth the best they can be in not just appearance, but also function and health. We offer a variety of cosmetic dentistry options, each customized to suit your dental needs.

Custom Dentures: We can help build you a new smile from the ground up. Our approach to dentures ensures maximum comfort and the most convincing smile that modern technology can provide.

Dental Implants: Pine Ridge Dental places dental implants and restores them in our office. We also work in partnership with oral surgeons when it is more complex. Implants are not teeth, yet often look feel and behave like the real deal.

TMD Treatment: While most specialists seek only to relieve pain caused by TMD, we at Pine Ridge Dental seek to identify the core culprit of your TMD issues and resolve it.

Occlusal Disease: Occlusal Disease occurs when the "bite" of the jaw is uneven and is the cause of many tooth problems. It can be overlooked in favor of treating its symptoms. Pine Ridge Dental can help with Occlusal Disease and prevent problems in the future.

BioClear Restoration: Bioclear is a minimally invasive and cost-effective treatment for restoring and shaping your teeth. Using the Bioclear special composite bonding technique, we can close tooth gaps improving the integrity of the gum and the appearance of your smile.
